

PRE-ENGAGEMENT INSPECTION AGREEMENT TIMBER PEST INSPECTION REPORT

PRE-ENGAGEMENT NUMBER (where applicable):

This form is to be completed by the Client. **Special attention should be given to the Terms and Conditions set out in Clause A.1.** Use block letters or [X] where appropriate. Complete all relevant sections: non-completion may delay response.

SERVICE REQUESTED BY CLIENT

Option 1 STANDARD TIMBER PEST DETECTION REPORT

The purpose of the inspection is to assist the Client to identify and understand any Timber Pest issues observed at the time of inspection. (See also Terms and Conditions – Service, Option 1)

Option 2 SPECIAL-PURPOSE INSPECTION REPORT (See Terms and Conditions – Service, Option 2)

Is a Standard Inspection Report to be included with this Special-Purpose Inspection Report?

Specify type and scope of Special-Purpose Inspection Report requested in Special Conditions or Instructions below.

Option 3 SUBTERRANEAN TERMITE MANAGEMENT PROPOSAL (See Terms and Conditions – Service, Option 3)

SPECIAL CONDITIONS OR INSTRUCTIONS

Are there any special conditions or instructions? If “Yes” specify:

SUPPORT DOCUMENTATION

Will the Client be providing any documents (e.g. Certificate of Subterranean Termite Treatment to support this application)?

. If “Yes” specify:

TIMBER PEST DETECTION CONSULTANT

NAME: **Tony Taylor - Universal Pest Management**

ADDRESS: **42 Crockett Street Cardiff South**

PHONE: **0414516262**

FAX: **0249547800**

EMAIL: **tony@universalpest.com.au**

STATEMENT OF CLIENT - Please read carefully before signing.

The Client requests the Timber Pest Detection Consultant named above to inspect the property and furnish a Timber Pest Detection Report in accordance with the Terms and Conditions in this document. The Client acknowledges that they have read and understood and agree to all the Terms and Conditions contained in this Pre-Engagement Inspection Agreement, as set out in this document.

I ENCLOSE/AGREE TO PAY WITHIN **24hrs (1) (Prior to Inspection)** DAYS THE TOTAL AGREED FEE OF: **\$595.00**

SIGNATURE OF CLIENT: DATE:

NAME OF PRINCIPAL FOR WHOM REPORT OBTAINED:

CLAUSE A.1 – TERMS AND CONDITIONS

SPECIAL CONDITIONS

1. The Timber Pest Detection Consultant reserves the right to reject any request for inspection at the consultant's absolute discretion. In this event, any fees, deposit or other monies paid by the client will be refunded.
2. The Timber Pest Detection Consultant shall not be liable for failure to perform any duty or obligation that the consultant may have under this agreement, where such failure has been caused by inclement weather, industrial disturbance, inevitable accident, inability to obtain labour or transportation, or any cause outside the reasonable control of the consultant.

SERVICE

As requested by the *Client*, the inspection carried out by the *Timber Pest Detection Consultant* ("the Consultant") is to be based solely on one of the following options:

Option 1 A Standard Timber Pest Detection Report only deals with the detection or non detection of *Timber Pest Attack* and *Conditions Conducive to Timber Pest Attack* discernible at the time of inspection. The inspection is limited to the *Readily Accessible Areas* of the *Building & Site* (see Note 1) and is based on a visual examination of surface work (excluding furniture and stored items), and the carrying out of *Tests*. Unless otherwise agreed and noted in "Special Conditions or Instructions" for this report request, the acceptance criteria against which the subject building will be assessed is: The building being inspected is to be compared with a similar building (see Note 2). To the Consultant's knowledge the similar building used for comparison was constructed in accordance with generally accepted timber pest management practices and has since been maintained during all its life not to attract or support timber pest infestation.

Note 1. With strata and company title properties, the inspection is limited to the interior and the immediate exterior of the particular residence to be inspected. Common property is not inspected as part of the Report.

Note 2. If the building is not comparable to a similar building (e.g. due to unusual design or construction techniques), then the inspection shall be based on the general knowledge and experience of the Consultant.

Option 2 A Special-Purpose Inspection Report must include the defined purpose, scope and acceptance criteria on which the inspection report is to be based. A Special-Purpose Inspection Report may include Option 1 as well as the particular requirements of the Client which are specified and where applicable attached to this document.

Option 3 In addition to Option 1 a Subterranean Termite Management Proposal in accordance with Australian Standard AS 3660.2 to treat infestation and/or manage the risk of future subterranean termite access to buildings and structures.

Unless noted in "Special Conditions or Instructions", the Report assumes that the existing use of the building will continue.

The Report only records the observations and conclusions of the Consultant about the readily observable state of the property at the time of inspection. The Report therefore cannot deal with:

- (a) possible concealment of defects, including but not limited to, defects concealed by lack of accessibility, obstructions such as furniture, wall linings and floor coverings, or by applied finishes such as render and paint; and
- (b) undetectable or latent defects, including but not limited to, defects that may not be apparent at the time of inspection due to seasonal changes, recent or prevailing weather conditions, and whether or not services have been used some time prior to the inspection being carried out.

These matters outlined above in (a) & (b) are excluded from consideration in the Report.

If the Client has any doubt about the purpose, scope and acceptance criteria on which the Report is to be based please discuss your concerns with the Consultant before ordering the Report.

The Client acknowledges that, unless stated otherwise, the Client as a matter of urgency should implement any recommendation or advice given in the Report.

LIMITATIONS

The Client acknowledges:

1. The Report does not include the inspection and assessment of matters outside the scope of the requested inspection and report.
2. The inspection only covers the Readily Accessible Areas of the Building and Site. The inspection does not include areas, which were inaccessible, not readily accessible or obstructed at the time of inspection. Obstructions are defined as any condition or physical limitation which inhibits or prevents inspection and may include – but are not limited to – roofing, fixed ceilings, wall linings, floor coverings, fixtures, fittings, furniture, clothes, stored articles/materials, thermal insulation, sarking, pipe/duct work, builder's debris, vegetation, pavements or earth.
3. The detection of drywood termites may be extremely difficult due to the small size of the colonies. No warranty of absence of these termites is given.

4. European House Borer (*Hylotrupes bajulus*) attack is difficult to detect in the early stages of infestation as the galleries of boring larvae rarely break through the affected timber surface. No warranty of absence of these borers is given. Regular inspections including the carrying out of appropriate tests are required to help monitor susceptible timbers.
5. The Report is not a structural damage report. Neither is it a warranty as to the absence of timber pest attack.
6. If the inspection is to be limited to any particular type(s) of timber pest (e.g. termites), then this would be the subject of a Special-Purpose Inspection Report, which is adequately specified.
7. The Report does not cover or deal with environmental risk assessment or biological risks not associated with Timber Pests (e.g. toxic mould) or occupational, health or safety issues. Such advice may be the subject of a Special-Purpose Inspection Report which is adequately specified and must be undertaken by an appropriately qualified inspector. The choice of such inspector is a matter for the Client.
8. The Inspection Report is to be produced for the use of the Client named in this Pre-Engagement Inspection Agreement. The Consultant or their firm or company are not liable for any reliance placed on the report by any third party.

EXCLUSIONS

The Client acknowledges:

1. The Report does not deal with any timber pest preventative or treatment measures, or provide costs for the control, rectification or prevention of attack by timber pests. However, this additional information or advice may be the subject of a Timber Pest Management Proposal, which is adequately specified.

DEFINITIONS

Timber Pest Attack means Timber Pest Activity and/or Timber Pest Damage.

Timber Pest Activity means telltale signs associated with 'active' (live) and/or 'inactive' (absence of live) Timber Pests at the time of inspection.

Timber Pest Damage means noticeable impairments to the integrity of timber and other susceptible materials resulting from attack by Timber Pests.

Major Safety Hazard means any item that may constitute an immediate or imminent risk to life, health or property resulting directly from Timber Pest Attack. Occupational, health and safety or any other consequence of these hazards has not been assessed.

Conditions Conducive to Timber Pest Attack means noticeable building deficiencies or environmental factors that may contribute to the presence of Timber Pests.

Readily Accessible Areas means areas which can be easily and safely inspected without injury to person or property, are up to 3.6 metres above ground or floor levels, in roof spaces where the minimum area of accessibility is not less than 600 mm high by 600 mm wide and subfloor spaces where the minimum area of accessibility is not less than 400 mm high by 600 mm wide, providing the spaces or areas permit entry. The term 'readily accessible' also includes:

- (a) accessible subfloor areas on a sloping site where the minimum clearance is not less than 150 mm high, provided that the areas is not more than 2 metres from a point with conforming clearance (i.e. 400 mm high by 600 mm wide); and
- (b) areas at the eaves of accessible roof spaces, that are within the consultant's unobstructed line of sight and within arm's length from a point with conforming clearance (i.e. 600 mm high by 600 mm wide).

Client means the person or persons, for whom the Timber Pest Detection Report is to be carried out or their Principal. (i.e. the person or persons for whom the report is being obtained.)

Timber Pest Detection Consultant means a person who meets the minimum skills requirement set out in the current Australian Standard AS 4349.3 Inspections of Buildings. Part 3: Timber Pest Inspection Reports or state/territory legislation requirements beyond this Standard, where applicable.

Building and Site means the main building (or main buildings in the case of a building complex) and all timber structures (such as outbuildings, landscaping, retaining walls, fences, bridges, trees and stumps with a diameter greater than 100 mm and timber embedded in soil) and the land within the property boundaries up to distance of 50 metres from the main building(s).

Timber Pests means one or more of the following wood destroying agents which attack timber in service and affect its structural properties:

- (a) *Chemical Delignification* - the breakdown of timber through chemical action.
- (b) *Fungal Decay* - the microbiological degradation of timber caused by soft rot fungi and decay fungi, but does not include mould, which is a type of fungus that does not structurally damage wood.
- (c) *Wood Borers* - wood destroying insects belonging to the order 'Coleoptera' which commonly attack seasoned timber.
- (d) *Termites* - wood destroying insects belonging to the order 'Isoptera' which commonly attack seasoned timber.

Tests means additional attention to the visual examination was given to those accessible areas which the consultant's experience has shown to be particularly susceptible to attack by Timber Pests. Instrument Testing of those areas and other visible accessible timbers/materials/areas showing evidence of attack was performed.

Instrument Testing means where appropriate the carrying out of Tests using the following techniques and instruments:

- (a) *electronic moisture detecting meter* - an instrument used for assessing the moisture content of building elements;
- (b) *stethoscope* - an instrument used to hear sounds made by termites within building elements;
- (c) *probing* - a technique where timber and other materials/areas are penetrated with a sharp instrument (e.g. bradawl or pocket knife), but does not include probing of decorative timbers or finishes, or the drilling of timber and trees; and
- (d) *sounding* – a technique where timber is tapped with a solid object.
